

# pxFAQ

POST FREQUENTLY ASKED QUESTIONS ON YOUR WEB SITE

## FAQ \$1250

pxFAQ equips your Web site with the ability to display answers to your most frequently asked questions. pxFAQ is an easy-to-use interface for adding questions and answers to your Web site to keep visitors abreast of common questions and answers about your service or company. Optionally you can enable site visitors to suggest new questions for you to answer. If you choose you can provide an answer and activate the question and answer and it will be added to your FAQ. A designated site administrator(s) from your company is given a login to access a management interface where they are able to add, edit and delete Q&A.

## pxFAQ includes:

### Features

- Adds constantly changing content to your site
- Site visitors can suggest questions
- Improves Search Engine Ranking
- Taggable for Search Engine Optimization
- Easy to use interface

### Editable Fields

- Category
- Question Text
- Question Submitter (name, city, state) - optional
- Answer Text
- Tags
